SUKHARANJAN JANA

Software Development Engineer (SDE) | Java Full Stack Developer

228 Attapur Hyderabad 500048 | sukharanjanjana767@gmail.com | +91 9382259748 | github.com/Sukh767

Programmer Analyst at Cognizant and Java Full Stack Developer skilled in Java, Spring Boot, React, Hibernate, REST APIs, SQL, and MongoDB. Hands-on experience building full-stack applications from design to deployment, with a strong focus on backend development, API design, and scalable web solutions.

PROFESSIONAL EXPERIENCE

Programmer Analyst | Cognizant, Hyderabad, India

June 2025 – Present

- Completed enterprise-level training in Java Full Stack Development with React at Cognizant.
- Developed and enhanced web application features using Java, Spring Boot, React, and RESTful APIs.
- Integrated backend services with relational databases and implemented CRUD operations.
- Collaborated in Agile development environments using Git, GitHub, and Postman.
- Participated in debugging, testing, and performance optimization of applications.

EDUCATION

Bachelor of Technology in Information Technology

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar, Odisha | Graduated 2025

- **Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

SKILLS

- **Programming:** Java, JavaScript, C++
- **Frontend:** React.js, Tailwind CSS
- **Backend:** Spring Boot, Spring Framework, Hibernate/JPA, Node.js
- **Tools:** Git, GitHub, Postman, Docker, Linux
- **AI Tools:** GitHub Copilot, Claude, Gemini

PROJECTS

Scan & Dine | Multi-Tenant Restaurant SaaS Platform, MERN Stack

Built a production-ready multi-tenant restaurant SaaS platform enabling QR-based ordering, secure customer and restaurant partner authentication, restaurant onboarding and approval workflow, menu and table management, staff management, reservations, payment integration, and real-time order processing using the MERN stack with a scalable Repository–Service architecture, JWT authentication, Cloudinary media management, and role-based access control.

Healthcare Appointment Management System | Spring Boot, React, MySQL, GitHub

Developed a full-stack healthcare platform enabling appointment booking and management for patients and doctors.Implemented JWT-based authentication, role-based authorization, and secure HttpOnly cookie handling. Built RESTful APIs using Spring Boot and Hibernate JPA for appointment scheduling and status management. Designed responsive React-based dashboards for patients and doctors with real-time data updates.

CERTIFICATIONS

- Google Advanced Data Analytics | Coursera
- Git Complete: The Definitive, Step-by-Step Guide to Git | Udemy June 2026
- Java Developer Internship Certificate | Qveto Technologies | 2024
